Introduction

As implied in the title, this bibliography lists recent publications in English on the whole array of environmental problems in Japan. The term "related" is used to indicate that much general background material on Japan having a bearing on environmental quality is also included.

Entries are classified by subject into seventeen subject categories. Within each subject category, entries are arranged alphabetically by author under five document categories as follows: (1) journal articles, (2) books and monographs, (3) municipal and prefectural agency documents, (4) Japanese government agency documents, (5) international agency documents.

The coverage of relevant municipal, prefectural and national government documents is believed to be fairly comprehensive for the period 1970 through early 1973, with the qualification that only a limited number of in-print publications appearing in the Baerwald and Chang bibliographies listed on page 5 and none of the articles appearing in the Japan Report and Tokyo Metropolitan News indexes are repeated here. The coverage of the three other document categories is probably somewhat less comprehensive.

Although the bibliography primarily covers the period 1970 through early 1973, many earlier works that do not specifically appear in other bibliographies, such as the pamphlets in the Institute of Population Problems English pamphlet series, are included. The Baerwald bibliography is a useful supplementary guide to the literature in English published prior to mid-1970 in many of the subject areas covered in this work.

Although most of the publications listed are in English, a limited number of useable Japanese-language documents are included. These publications are of three types: articles in Japanese with English summaries, maps, and statistical sources which require only the translation of subject headings and subheadings to be practicable for use. All publications in Japanese are so labeled.

With one tricky exception, there is no cross-referencing. However, publications that cover more than one subject area, such as area-wide publications, collections and others, are annotated where appropriate to indicate all or most of the subject areas covered.

Since most of these publications are difficult to locate, the addresses of publishers or sales agents, if known, are given at the end of the bibliography. The numbers printed at the end of particular entries correspond to these addresses. Unless otherwise noted, all entries are in print.

Prices are quoted for information only. It is necessary to send for an invoice of current price, handling and postage charges before sending remittances. Unpriced material, if available, is abbreviated as N.C. for no charge. When ordering free material from a source in Japan, it is a good practice to enclose international postal reply coupons to cover the cost of return postage.

In a few cases, complete information regarding a particular entry could not be traced, resulting in a few entries that are incomplete.

Four basic references are recommended for those who wish to keep up-to-date regarding the latest publications on environmental affairs in Japan:

The Japan Quarterly provides fairly good coverage of books and government documents (but not periodical articles) published in Japan, although about one to two years after the dates of publication, in its listing of "Recent Japanese Publications on Japan."

The Japan Times and other English-language newspapers published in Japan publish announcements of important new and forthcoming Japanese government documents in English.

Two American bibliographies, the Public Affairs Index and Current Geographical Publications, provide a listing of an enormous variety of useful items in English, including periodical articles, published throughout the world. Publications on Japan's environment appear occasionally, with the price and address of the source given in the P.A.I. where appropriate.

None of the above sources, however, provide an extensive listing of Japanese municipal, prefectural or national government publications, particularly unpriced material. The most comprehensive way of keeping up with this material is to write directly to the agencies indicated in the back of the bibliography.

BIBLIOGRAPHIES

Baerwald, D. and C. Saeki. The urban way: a guide to research on Japanese cities. Monticello, Illinois: Council of Planning Librarians, November 1970. 120p. (Exchange Bibliography No. 160-161.) \$10.00. 1

Chang, D. Asia and Pacific planning bibliography No. 3. Monticello, Illinois: Council of Planning Librarians, May 1972. (Exchange Bibliography 280-281.) \$9.00. Partial contents: Country index, Japan, p. 49-51. 1

Chang, D. Asia and Pacific planning bibliography No. 4. Monticello, Illinois: Council of Planning Librarians, March 1973. (Exchange Bibliography 380-381.) \$12.50. Partial contents: Country index, Japan, p. 135-137. 1

Hall, R. B. and T. Noh. Japanese geography: a guide to Japanese reference and research materials. (Rev. ed.) Ann Arbor: University of Michigan Press, 1970. 333p. (The University of Michigan Center for Japanese Studies, Bibliographical Series No. 6/Rev. ed./) \$5.00. "The intent in compiling this bibliography has been to bring to the attention of Western geographers and other interested scholars those geographical writings of the Japanese which have appeared in the Twentieth Century and which are regarded by the compilers as significant contributions." Includes 1,468 annotated entries. 2

Harris, D. C., J. D. Fellman and J. A. Licate. International list of geography serials. Chicago: University of Chicago Press, 1971. (University of Chicago Research Paper No. 138.) \$4.50. Partial contents: comprehensive list of Japanese geography serials, p. 103-105.)

AREA-WIDE ENVIRONMENTAL PUBLICATIONS, ENVIRONMENTAL COLLECTIONSArticles

Area development in Japan: Japan's environmental problems. Tokyo: Japan Center for Area Development Research, 1972. 29p. (No. 5.) Contents: Economic growth and environmental problems - Environmental pollution and citizen's movement: the social significance of the anti-pollution protest in Japan - An American's view of Japan's environmental problems. 3

Concerning the present problems of public hazard. JSR. No. 207, July 15, 1970. p. 6-7.

Environmental Disruption. In: The Oriental Economist. Japan Economic Yearbook 1972, n.d., p. 119-124.

Ui, J., ed. Polluted Japan: reports by members of the Jishu-Koza citizens movement. Tr. by A. A. Carter. Tokyo: Jishu-Koza, 1972. 79p. Maps, 600. The first issue of a quarterly - tentatively titled - newsletter from polluted Japan - is due at an unspecified date. 7

Yoshida, K. Air and water pollution in Yokkaichi, n.d. ?p.

Prefectural Documents

Bureau of Environmental Protection. Tokyo Metropolitan Government. Report on the Tokyo conference on environmental protection, Tokyo, November 8-11, 1971 (Pub. May 1972). 154p. Map. N.C. "This report is a record of the conference of administrators in charge of environmental problems in the cities of Tokyo, London, New York, and Chicago." 8

Environmental Department of Aichi Prefectural Government. Environmental problems in Aichi. (Nagoya) August 1971. 64p. Maps. N.C. 9

Environmental and Public Health Bureau. Osaka Municipal Government. Environmental pollution on Osaka City. (Osaka) December 1971. 52p. Maps. N.C. "This booklet is a compilation of results of various surveys and investigations on pollution conducted in the city and countermeasures derived therefrom." 10

Tokyo Metropolitan Government. Tokyo fights pollution: an urgent appeal for reform. (Tokyo) 1971. 267p. Maps. (TMG Municipal Library No. 4.) ¥ 500. An abridged translation of the 1970 white paper on pollution. 6

Tokyo Metropolitan Research Institute for Environmental Protection. Tokyo Metropolitan Government. Annual report of the Tokyo Metropolitan Research Institute for Environmental Protection. (Tokyo) 1971. 74p. Maps. N.C. A translation of essays selected from the second annual report of the institute. Partial contents: Considerations on carbon monoxide concentrations in crossroads environs - A fundamental survey for quality improvement of the Sumida and Tama Rivers in Tokyo. 11

Tokyo Metropolitan Research Institute for Environmental Protection.
Tokyo Metropolitan Government. Annual report of the Tokyo
Metropolitan Research Institute for Environmental Protection.
(Tokyo) 1972. 73p. Maps. N.C. A translation of essays
selected from the third annual report of the institute.
Partial contents: Policy for vehicle traffic control in
respect to anti-pollution measures - Research on influence
of aircraft noise upon daily life of residents around
Yokota Air Base. 11

Japanese Government Documents

Environment Agency, Japan. The human environment in Japan. (Tokyo)
February 1972. 92p. N.C. "This volume consists of assorted
papers written by staffs on human environment issues."
Partial contents: Air quality control measures - paper and
pulp industry - Marine pollution problems - Industrial plants
relocation. 24 papers. 12

Environment Agency. Japan. Quality of the environment in Japan.
(Tokyo) 1972. 245p. ¥ 1,000. "The . . . book is a
condensed version of the white paper on the environment sub-
mitted to the 68th Session of the Diet under the Basic Law
for Environmental Pollution Control . . . Problems of only
local significance have been deleted." 13

Ministry of Foreign Affairs. Japan. Problems of the human
environment in Japan: report to the United Nations, March 31,
1971. (Tokyo) 1971. 39p. (Japan reference series No. 2-71.)
¥ 200. 13

Resources Council. Science and Technology Agency. Japan. Report
on the development of human environment in the cities.
(Tokyo) December 1969. 46p. (Report No. 53.) N.C. 14

AIR POLLUTION

Articles

Kawamura, T. Air pollution in urban areas in Japan. Geographical
Review of Japan, Vol. 45, No. 3, 1972. p. 231-245. Maps.
In Japanese with English summary.

Ohtaira, T. Research on regional representativity of atmospheric SO₂
concentration at the air pollution monitoring stations in
Tokyo. Journal of Japan Society of Air Pollution, Vol. 3,
No. 3, 1969. p. 182-192. Maps. In Japanese with English
summary.

Where it comes down in chunks. Economist, Vol. 236, No. 6628,
September 5, 1970. p. 43-44.

Prefectural Documents

Bureau of Environmental Protection. Tokyo Metropolitan Government.
The air pollution control center. (Tokyo) n.d. 23p. Maps.
N.C. Brochure. 8

Japanese Government Documents

Environment Agency. Japan. Air pollution control in Japan (Tokyo).
May 1972. 60p. Map. ¥ 200. Report submitted to the United
Nations Conference on the Human Environment. 13

Okita, T. Review of study of air pollution in Japan in 1970 and
1971. Tokyo: Institute of Public Health, n.d. 12p. Mimeo.

Environment Directorate. Organization for Economic Co-Operation and Development. Instances, if any, where cost/benefit analysis has been applied to environmental problems: Japan. Paris: OECD, 1972. 6p. N.C. Document No. 85248. 16, 40

SELECTED PERIODICALS

Asahi Shimbun. Japan Quarterly. (Tokyo) \$7.00 per year. Primarily, a journal of commentary on social, cultural and political affairs in Japan; articles on environmental issues of current interest appear occasionally. 6

Japan Information Service. Japan report. (New York) N.C. The twice monthly eight to ten page newsletter of the Consulate General of Japan. It contains news and comment on all aspects of the country, including the environment. A series of survey articles reviewing the planning policies of Japan's major cities appear in the mid-April through June 1973 issues. Annual subject indexes are available. Permanent subscriptions may be placed without charge for postage. 62

Japan Society of Air Pollution. Journal of the Japan Society of Air Pollution. (Tokyo) Twice yearly journal containing highly technical and specialized articles in Japanese with English summaries on all aspects of air pollution and its control.

Tokyo Metropolitan Government. Tokyo municipal news. (Tokyo) N.C. A ten to fifteen page monthly providing information about the city, and especially its problems. Issues often have a single theme, e.g., transportation planning; garbage disposal; the World Conference of Cities. A cumulative subject index for the period 1967-1971 was published in the January-February 1972 issue. Permanent subscriptions may be placed without charge for postage. 63

Utility Research Center. Environmental protection and industry. (Tokyo) \$15.00 per year. A bimonthly journal featuring technical articles on the Japanese pollution control equipment industry, nontechnical articles on environmental topics, and a useful nationwide environmental news summary. 61

Water Japan. (Tokyo) Contains both technical and nontechnical articles on all facets of the management of the country's scarce water resources.
